

Solving your Radiology Coverage Needs in a COVID-19 Environment

Does your hospital need a flexible, subspecialized radiology partner?

LUCIDHEALTH

THE CHALLENGE

Hospitals today face a number of COVID-enhanced challenges - especially when it comes to imaging. Appropriate radiologist staffing, subspecialty reading acumen and unpredictable workflow are some of the most critical. Radiologists, as the physician's physician, are critical to the efficiency of your medical staff.

Meeting these challenges means transforming from the old institution-based model, where image storage and workflows were developed for ease of use by an organization into a more patient-centric approach.

COVID has put everyone to the test.

THE SOLUTION

LucidSolutions™, our radiology services platform offers solutions through our proprietary technology, RadAssist®. This offering creates a portable, virtual-imaging archive that can be accessed by a patient's entire medical team, regardless of location. RadAssist® delivers the right images to the right subspecialized radiologist at the right time. Powered by our radiologists, LucidSolutions™ is a patient-centered offering that delivers radiology services onsite or remotely enabling prioritization of a radiologist's workload.

To learn more about RadAssist® or any of LucidHealth's onsite and remote reading solutions, [contact us](#).

It just may be the boost your imaging department needs!

Increased practice **productivity** and access to the highest quality services

Complete patient history in a **single interconnected interface** across unrelated healthcare systems

Imaging **workflow solutions** designed by radiologists for radiologists

Access to a broad network of **subspecialized radiologists**

Virtual Reading Rooms

24/7 Clinical Workflow Support Staff

Real-time Virtual Patient Archive
