### About Riverside Radiology and Interventional Associates:

RRIA is one of the largest sub-specialized private radiology practices in the country having over 100 diagnostic and interventional radiologists on staff. We serve a wide range of hospitals throughout Ohio including tertiary care hospitals and regional hospitals and this provides an excellent case mix for our subspecialized radiologists. The IT workflow of RadAssist allows Radiologists to practice a high percentage of their subspecialty regardless of their location. At any given time throughout the day a radiologist within our practice is working with multiple other radiologists which makes it easy to consult on cases with colleagues and have subspecialty support. RRIA is continually recognized as a national leader in radiology.
